PROFESSIONAL SUMMARY

Software Engineer skilled in building fast, reliable web apps with React, Next.js, and Node.js. Recently worked on Hutstack, developing core admin features and a marketing site. Improved UX and performance across projects, including 40% higher retention at Hivedeck and 30% traffic growth for clients.

Skills

Frontend Development

React.js, React Native, Next.js, TypeScript, Redux Toolkit, Tailwind CSS, Material UI, Bootstrap, SASS

Backend Development

Node.js, Express.js, Laravel, RESTful APIs, GraphQL.

Database

MySQL, PostgreSQL, MongoDB, SQLite.

Web Development Tools

WordPress (Themes/Plugins), Elementor Pro, Hivedeck.

DevOps

Git, GitHub, Docker, CI/CD Pipelines.

Other Skills

Agile, Scrum, Project Management, Technical Recruiting.

Professional Experience

Frontend Engineer

February 2025 – present

Insightful3D 

Lagos, Nigeria

- Developed core features for Hutstack, a modern property management platform, using React, Redux, and ShadCN UI. Implemented lease tracking, maintenance records, and financial analytics for landlords and property managers.
- Updated and refined the frontend of Richard Brainsworth, a property showcase for Richard's Court, using React.js. Enhanced the listing structure and adjusted redirect flows to streamline navigation to the main site for pricing details.
- Improved user interaction and tracking flows on Richard Brainsworth, leading to a 60% increase in click-throughs to pricing details within three months.

Software Engineer

November 2021 – December 2024

Wazobia Technologies 

Lagos, Nigeria

- Architected CMS optimization for Jungle Creation, improving article publishing speed by 30%

- Optimized websites for UK clients including Twisted Food, Fournine, and VT, increasing traffic by 15% and enhancing user experience.
- Developed Hivedeck, a website builder for 500+ businesses, increasing client retention by 40% and boosting revenue growth.
- Rebuilt the company website with React.js & Material UI, cutting load times by 50% and increasing engagement by 25%.

Projects

Hutstacks [↗](#)

- Developed the admin dashboard using React, TypeScript, ShadCN UI, redux featuring lease tracking, maintenance logs, and financial analytics.
- Created reusable UI components and charts to ensure scalability and consistent user experience.
- Built and deployed the marketing website (x.hutstack.com [↗](#)) to showcase product features and drive engagement.

Hivedeck [↗](#)

- Collaborated with a team of engineers to build a no-code website builder for small businesses.
- Created and integrated two customizable templates (Elegante and Eatup) into the editor for client use.
- Developed the client-side form service, allowing users to create forms, add questions, and view responses from the dashboard.

Richard Brainsworth [↗](#)

- Built Richard Brainsworth as the front-facing property showcase for Richard's Court, featuring all active listings with a clean redirect flow to the main site for pricing details.
- Engineered seamless cross-domain tracking to optimize the user journey, ensuring 95%+ redirect success rates.
- Drove 35% more referral traffic to Richard's Court's conversion platform within 3 months, with 60% of visitors clicking through to view pricing.

Kioskhive [↗](#)

- Built a backend with Laravel, reducing API response time by 60% through caching and database optimization.
- Created and tested 10+ API endpoints using Postman and Thunk API, ensuring smooth data flow and performance.
- Designed and implemented analytics dashboards on the admin side, enabling real-time monitoring of sales.

Jay store [↗](#)

- Built an e-commerce site with React.js, Redux Toolkit, and Tailwind CSS, improving load speed and usability.
- Added product search, filtering, and pagination to improve navigation and user engagement.
- Created a shopping cart with real-time updates, allowing users to add, remove, and purchase items instantly.

Education

Bachelor of Technology (B.Tech.) in Applied Geophysics
Olusegun Agagu University of Science and Technologies

January 2016 – November 2021

Certificates

- Complete Web Development Bootcamp. [↗](#)
- Complete React, Next.js & TypeScript Projects Course. [↗](#)
- Complete Agile Scrum Master Certification. [↗](#)
