PROFESSIONAL SUMMARY

Software Engineer with experience building React and Next.js applications using TypeScript. I've worked on dashboards, CMS platforms, SaaS products, property management platforms and data-driven web applications across frontend and full-stack environments. I'm comfortable working in teams, writing clean code and improving performance and I'm always looking to deepen my understanding of testing and fullstack development.

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), Redux Toolkit, Context API

UI Frameworks: Tailwind CSS, ShadCN UI, Chakra UI, Material UI, Styled Components, Bootstrap

Backend and APIs: Node.js, Laravel (PHP), REST APIs, GraphQL, Medusa.js, Webhooks

Databases: PostgreSQL, MySQL, MongoDB

DevOps and Tools: Git, CI/CD, Docker, Vercel, Agile/Scrum, Jira, Postman, n8n

Testing: Unit Testing, Integration Testing, Cypress, Postman API Testing

WORK EXPERIENCE

Frontend Engineer Zenthom

Remote

January 2025 to Present

- Built the complete frontend for Zenthom, a B2B2C facility maintenance SaaS platform from scratch, working directly from Figma designs across three separate role-based dashboards for HQ, Facility Managers and Customers.
- Built a scalable React TypeScript codebase with Redux Toolkit, React Query and Axios, implementing strict role-based access control across HQ, FM and Customer portals with separate authentication flows for each user type.
- Delivered a multi-step customer onboarding flow including OTP verification, service address setup and a welcome experience, alongside a full FM operations dashboard covering job lifecycle management, artisan tracking, invoice generation and subscription plan enforcement.

Software Engineer Wazobia Technologies

Remote

November 2021 to December 2024

- Architected the core template engine for Hivedeck, a no-code website builder serving over 500 businesses, Designed the editor architecture and built two production-ready templates.
- Optimised the CMS for UK client Jungle Creation, improving article publishing speed by 30% and reducing editorial turnaround time on high-volume content days.
- Rebuilt the company website using React.js and Material UI, cutting load times by 50% and increasing user engagement by 25% through improved component structure, image optimisation, and responsive design.
- Improved frontend performance and SEO for Twisted Food, Fournine, and VT, delivering a 15% increase in organic traffic through Core Web Vitals improvements and structured data implementation.
- Supported technical recruitment by assessing incoming engineers on React architecture, frontend fundamentals, and problem-solving.

Frontend Engineer Insightful3D

Remote

February 2025 to Present

- Led frontend development for Hutstack, a property management SaaS, using React, Redux Toolkit, TypeScript, and ShadCN UI building lease tracking, maintenance records, and financial analytics modules for landlords and property managers.

- Built a financial analytics dashboard with reusable chart components for real-time insights.
- Built and deployed the Hutstack marketing website and Richard Brainsworth property showcase, driving a 60% increase in click-throughs to pricing details within three months.
- Engineered cross-domain redirect tracking with a 95%+ redirect success rate, generating a 35% uplift in referral traffic to the conversion platform within 90 days.
- Improved page load performance through lazy loading, code splitting, and bundle size reduction, resulting in measurably faster time-to-interactive across dashboard views.

FEATURED PROJECTS

Zenthom - Facility Maintenance SaaS Platform www.zenthom.com

- Built the entire frontend from scratch for a premium B2B2C property maintenance platform serving Facility Managers, Customers and HQ admins across three completely separate dashboards. Stack includes React, TypeScript, Redux Toolkit, React Query and Tailwind CSS. Implemented role-based routing and auth guards, multi-step customer onboarding with OTP flow, FM job lifecycle management, artisan database, invoice generation and subscription tier enforcement.

Hivedeck - No-Code Website Builder <https://admin.hivedeck.com>

- Architected the core template engine for a no-code website builder serving 500+ businesses, building two production-ready client templates and the full editor component architecture in React and TypeScript.
- Led PropTech SaaS frontend development including the financial analytics engine and lease tracking system with full CRUD operations and real-time data updates.

Hutstack Property Management Platform <https://hutstack.com>

- Built the admin dashboard using React, TypeScript, ShadCN UI, and Redux, featuring lease tracking, maintenance logs, financial analytics, and role-based access control for property managers.
- Developed reusable UI components and chart libraries shared across the platform, and deployed the client-facing marketing website to drive product engagement.

VidMetrics - YouTube Analytics Dashboard <https://vidmetric-rho.vercel.app/>

- Built and shipped a YouTube competitor analytics dashboard in under 4 days using Next.js 14, TypeScript, Tailwind CSS, and RapidAPI
- Built a normalized performance scoring engine, channel comparison tools, spike detection, and PDF/CSV export reporting for enterprise media clients tracking competitor content strategies in real time.

Kioskhive <https://kioskhiveng.vercel.app/>

- Built REST APIs with Laravel, cutting average API response time by 60% through query optimisation, database indexing, and response caching. Designed real-time sales monitoring dashboards with custom chart components.

CERTIFICATIONS

Certified React Developer - Vskills

Certified React, Next.js and TypeScript Developer - Bootcamp

Certified Software Developer - Bootcamp

EDUCATION

B.Tech Geophysics, STEM Computational Science and Data Modelling

Olusegun Agagu University of Science and Technology

Relevant Coursework: Data Analysis, Computational Modelling, Scientific Computing, Statistical Methods
